# PATON & LEE

EQUINE VETERINARY SURGERY

*Happy New Year all!* We start by saying a huge thank you to all those who have nominated the practice and many of our vets for a Petplan Veterinary Award. It means a great deal to us to receive these certificates and really does make us feel so proud.

## New Website Feature

We are very excited to launch a new feature on our website enabling you to order your horses repeat medication or online prescriptions, anytime, anywhere. We know all too well what it's like when you finally sit down on the sofa at 10pm and suddenly remember all the things you have forgotten to do that day, so we feel this is going to be of huge benefit to you.

## Zone Day Special Offer

We know the cost of living is rising and we want to be able to help with your horse's routine healthcare. We have frozen last year's prices for vaccinations (Flu / Flu & Tetanus) at £55 including VAT.

The cheapest way to have your horse's teeth checked and rasped is now on one of our zone days, alongside their annual vaccinations. For anyone having a vaccination and teeth rasp done together on a zone day the price is £125 including VAT, plus the share of the visit fee. This price is the same with or without sedation. This offer is only available on our zone days when the teeth and vaccines are done together.

Zone day posters for next year are available to view and download from our website. These days are the best way to save on routine veterinary work – vaccinations, dental examinations, blood samples and health checks etc. Full terms are on our website, where you can also find a fully interactive Google Map to check exactly which zone your yard is in. <https://patonandlee.co.uk/details/24>

## Worm Care

Have you planned how your approach to worming this year? Our packages for 2024 are now available.

These plans are extremely popular because it's a simple, affordable way to get the best possible independent and expert advice about managing your horse's worming.

We use Faecal Worm Egg Counts (FWEC) during the spring - autumn months to assess which horses require worming as the future of effective worm control relies on the correct and responsible use of wormers combined with good pasture management.

Full details of our packages are available online or if you'd like any advice with our horses worming please email the practice.
